

Careers in Education

Our Careers in Education program offers students opportunities in working with young people, particularly in the fields of teaching, early childhood education, educational paraprofessionals, and social and human service occupations.

Students get experience on and off campus through a variety of practicum and internship opportunities that involve working with children in grades PK-12.

Students who complete this program will be prepared to take the Washington State Paraeducator exam, providing eligibility for employment as a Paraeducator directly after high school, or they can enter a teacher preparation program and return to Vancouver Public Schools for potential employment! Students are guaranteed an interview with VPS!

Equivalency and College Credits

Equivalency High School Credits:

- English (4th year)

Articulated College Credits

- EDUC 205 Intro to Education 5 credits
